

Dear respected recipient,

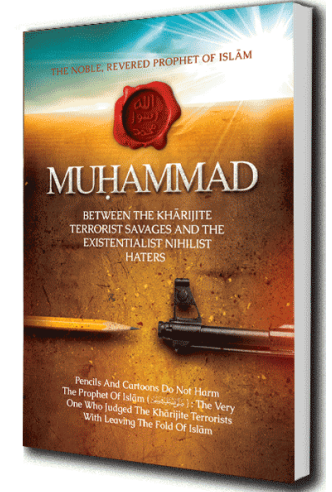

The past few decades have seen an increased focus upon resource-rich Middle-East and Central Asia which are lands inhabited by Muslims. In turn, Islām and its adherents have come under scrutiny due to the actions of renegade extremists and terrorists who are motivated by an age-old ideology of mass excommunication (*takfīr*) of Muslim rulers, governments and their societies, *before* they are motivated by grievances against Western nations for meddling in Muslim lands. These extremist movements and currents (which historically have been plaguing Muslim societies for centuries) are playing their part in the reshaping of the entire region, leading to volatility, anarchy and turmoil. As these events unfold the lives of *innocent Muslims and non-Muslims* are being adversely affected as either victims of terrorism or scapegoats for the actions of the terrorists. Then, mass media has its own role to play in spewing propaganda and hostility against Muslims in general. Enclosed is a book titled, “**The Noble Revered Prophet of Islām: Muḥammad**” which aims to address two important issues: That of terrorism performed in the name of Islām or attributed to it by others, and in turn, the revilement of the Prophet of Islām, Muḥammad (peace be upon him) and Muslims in general - as has occurred in the Danish cartoons of 2006 and the Charlie Hebdo magazine over the past decade at least. No matter what your religion, philosophy or background, whether you are neutral, sympathetic or antagonistic towards Islām or to Muslims, we hope you are able to spare just a couple of hours to read through this book. We anticipate it will bring something new to your understanding and perception of Islām, the person and character of the Prophet Muḥammad (peace be upon him) and the true origins of the evil ideology of the terrorists and what motivates them in reality.
